

ICS Website Redesign

Team Event Horizon:

April Huie
Celine Deleon
Chanelle Hojberg
Eric Tran
Juston Lin

Sprint Report #3

November 16, 2017

For the last two weeks:

Name	Task	Estimated Duration	Percent Completed
April	Sprint Report #3	1 day	100%
	Sequence Diagram for UML Draft #1	1 day	100%
	Hi-Fidelity Mobile Mock Up of Final Design	1 day	100%
Celine	Class Diagram for UML Draft #1	1 day	100%
Chanelle	State Diagram for UML Draft #1	1 day	100%
	Hi-Fidelity Desktop Mock Up of Final Design	1 day	100%
Eric	UML Class Diagram for UML Draft #1	1 day	100%
Juston	Update Trello and Github	1 day	100%
	Progress Report #3	1 day	100%
Collaborative Efforts	Finalize UML Draft #1	1 day	100%
	Update and finalize Requirements Final	1 day	100%
	Design Draft #2	2 days	100%
	Create and agree on a final design	2 meetings	100%
	Learn how to build a custom theme on WordPress	1 week	10%

For the next two weeks:

Name	Task	Estimated Duration	Percent Completed
April	UML Sequence Diagram for Prospective Faculty Member	1 day	100%
	Sprint Report #4	1 day	20%
Celine	UML Sequence Diagram for Graduate Student	1 day	0%
Chanelle	UML Class Diagram for Overall Website	1 day	0%
	Work on User Interface for Website via WordPress	2 days	0%
Eric	UML Class Diagram for Prospective Faculty Member	1 day	0%
Juston	UML Class Diagram for Graduate Student	1 day	0%
	Update Trello and Github	1 day	10%
	Work on User Interface for Website via WordPress	2 days	0%
Collaborative Efforts	Design and implement a custom theme in WordPress	1 week	0%
	UML Design Final	1 week	40%
	Design Final	1 week	50%

What went right:

- Receiving feedback from the whole ICS Website Taskforce Committee gave us a better understanding of exactly what kind of aesthetic they wanted the website design to have.
 - We were able to decide on what colors to use as well as how to lay out information and sections.
- Creating a mobile mock up based on the desktop mock up assured that the design would successfully be responsive as well as consistent in terms of an intuitive layout.
- Meeting with Matt at the beginning of the week allowed for more time to receive feedback from the ICS Website Taskforce Committee
 - Thus allowing us to experiment more with WordPress and have a better understanding of how to create and implement a custom theme.

What went wrong:

- We were confused about the UML Design Draft #1. We didn't understand what exact diagrams we needed or how to create them (regarding syntax).
 - We asked for clarification on assignment details from Professor Navarro.

- We used online resources to help us learn how to create UML diagrams.
- We were not able to edit the child theme templates on the WordPress website at first.
 - Matt was able to grant us access.
- Having trouble editing the .css file on WordPress

Obstacles we faced:

- Creating the UML Draft was difficult for us as we did not know whether to focus on the user experience or the actual features of the website.
 - We created diagrams for both situations to allow others to have a better understanding of how the website will work, but also allow ourselves to better understand what features we need to implement and how.
- WordPress difficulties
 - We communicated our troubles to Matt, who relayed them to the administrators, resulting in modifications to our editing permissions, answering questions and resolving our issues.

What we will do differently:

- Although we were not able to completely familiarize ourselves with the WordPress interface or the coding management side, we are continuing to experiment with WordPress.
- Regarding our UML Final, we will meet as a team to discuss what information should be on each diagram so that generating the actual diagrams will be more straightforward.
